MUMTAZ AHMAD

PRINCIPAL / SENIOR ANGULAR SOFTWARE ENGINEER | FRONT-END ARCHITECT

New Delhi, India • +91-9958339204 • mumtazahmad2004@gmail.com

Portfolio: ui-mumtaz.github.io/portfolio/

PROFESSIONAL SUMMARY

Senior Angular Software Engineer and Front-End Architect with 12+ years of experience developing and modernizing scalable web applications, including 10+ years specializing in Angular and TypeScript. Deep expertise in Angular architecture, component-driven UI development, state management, RxJS, NgRx, performance optimization, accessibility, and application modernization. Proven experience improving established codebases through modern Angular patterns, Standalone Components, Signals, OnPush change detection, reusable component architecture, and scalable design systems while maintaining application quality and existing functionality. Experienced technical leader who performs code reviews, mentors engineers, drives architecture decisions, and collaborates with product, UX, backend, and QA teams in Agile/Scrum environments. Uses AI-assisted development tools, including Claude Code, ChatGPT, and GitHub Copilot, to speed up delivery while personally reviewing and verifying all AI-generated code.

PROFESSIONAL EXPERIENCE

Cognizant (via Pacific) **May 2025–Oct 2026**

Senior Angular Developer

- Lead Angular 21 development for a large-scale Click & Collect and warehouse management platform.
- Modernized an established application by migrating 80+ legacy templates and 140+ components to modern Angular patterns, improving maintainability while preserving existing business functionality.
- Architected Standalone Components and a Signals-based state layer while advancing the application toward zoneless change detection.
- Improved front-end performance through OnPush change detection, @defer views, custom route preloading, modern control flow, and modular SCSS architecture.
- Built reusable, WCAG 2.1-accessible interfaces with strong focus on keyboard navigation, usability, and responsive user experiences.
- Collaborated with backend engineers on REST API integration and API contract design.
- Acted as a go-to engineer for Angular Signals and modernization and partnered with teams on architecture decisions.
- Used AI-assisted development tools, including Claude Code and GitHub Copilot, to speed up template migration, refactoring, debugging, and unit-test generation, personally reviewing and verifying all AI-generated code before merge.
- Delivered applications through GitLab CI/CD pipelines with Docker-based development environments and automated quality and security gates.

CBRE (via Savitr) **Dec 2023–Apr 2025**

Senior Angular Developer

- Developed and modernized scalable enterprise applications using Angular 17/18, TypeScript, RxJS, NgRx, and reusable component architecture.
- Migrated legacy NgModule-based applications to Standalone Components and modern build tooling, improving bundle efficiency and maintainability.
- Managed complex client-side application state using NgRx Store, Effects, and Selectors with reactive RxJS data flows.
- Improved front-end quality through TDD/BDD practices, Jest, Jasmine/Karma, and more than 80% code coverage across critical modules.
- Built responsive, reusable data-driven interfaces and shared UI components for enterprise applications.
- Contributed to WCAG 2.1 improvements, including focus management, keyboard navigation, and ARIA accessibility fixes.

Tata Consultancy Services **Sep 2021–Nov 2023**

Associate Consultant

- Built enterprise Angular applications using reusable component libraries, NgRx state management, and data-driven dashboards.
- Designed reusable chart, filtering, table, and drill-down components adopted across multiple business modules.
- Led Jest unit-testing initiatives and collaborated with QA to improve testability and delivery quality.
- Reviewed pull requests and mentored developers on Angular, NgRx, component architecture, and engineering standards.
- Worked in Agile/Scrum teams to estimate, develop, and deliver scalable application features.

E2E Networks Limited **Apr 2019–Aug 2021**

Senior Technical Lead – Angular

- Led front-end architecture and Angular upgrade initiatives for scalable web applications.
- Built modular single-page applications using lazy loading, route guards, HTTP interceptors, and reusable components.
- Established architecture conventions for module boundaries and lazy loading to improve maintainability and control initial bundle size.
- Mentored developers and conducted technical workshops on Angular architecture, component design, and RxJS.

Algoworks **May 2018–Apr 2019**

Senior Software Engineer

- Built responsive Angular applications using TypeScript, HTML5, CSS3, SCSS, and Bootstrap.
- Integrated RESTful APIs and delivered cross-browser and cross-device user interfaces.
- Worked directly with stakeholders to translate business requirements into scalable front-end solutions.
- Introduced reusable component patterns to improve consistency and reduce duplicated implementation.

Pitney Bowes **Apr 2013–Mar 2018**

Senior Software Engineer

- Developed web applications ranging from internal tools to large enterprise solutions.
- Built expertise in JavaScript, TypeScript, HTML5, CSS3, responsive design, and REST API integration.
- Collaborated with backend and QA teams throughout requirements, development, testing, and release.
- Created reusable UI patterns and utilities to improve development efficiency and maintainability.

SELECTED PROJECTS

Retail Click & Collect Platform — Liverpool

- Modernized a large Angular application using Angular 21, Standalone Components, Signals, and OnPush change detection.
- Improved application maintainability and performance while modernizing 142 components and 82 templates.
- Built accessible, data-driven interfaces for order management, returns, inventory, reporting, and appointment workflows.
- Implemented route preloading, real-time updates, barcode/QR functionality, and reusable UI patterns.
- Stack: Angular 21, TypeScript, RxJS, Angular Material, AG Grid, Firebase, Docker, GitLab CI/CD.

Signal Forms Form Builder

- Developed a hands-on Angular form-building project demonstrating modern Angular architecture and reusable, component-driven UI development.
- Project: ui-mumtaz.github.io/signal-forms/

Buyside / Sellside Trading Portal

- Developed two independently deployable Angular applications within an Nx monorepo using shared UI and workflow libraries.
- Managed complex multi-step application state using NgRx Store, Effects, Router Store, and RxJS.

- Built reusable dashboards and scalable shared component libraries.

EDUCATION

Magadh University, India **2011**

Master of Computer Applications

Board of Technical Education, India **2008**

Bachelor of Commerce

CORE SKILLS

Frontend Development: Angular (v2–v21), TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Bootstrap

Angular & UI Architecture: Component-Driven Architecture, Standalone Components, Angular Signals, OnPush Change Detection, Dependency Injection, Reactive Forms, Lazy Loading, Angular Router, HTTP Interceptors

State Management: RxJS, NgRx Store, Effects, Selectors, Router Store, Reactive Data Flows

Application Modernization: Legacy Angular Modernization, Angular Upgrades, Scalable Architecture, Maintainability, Design Patterns, SOLID Principles

Performance Optimization: Bundle Optimization, Code Splitting, Tree Shaking, Initial Load Optimization, Rendering Performance, Change Detection Optimization, Route Preloading, Virtual Scrolling, esbuild

Responsive & Accessible Design: Responsive Design, Mobile-Friendly UI, WCAG 2.1, ARIA, Keyboard Navigation, Focus Management

API & Integration: RESTful APIs, OpenAPI, WebSockets, SockJS, STOMP, GraphQL

Testing & Quality: Jest, Jasmine, Karma, Cypress, TDD/BDD, Unit Testing, Code Reviews, SonarQube, ESLint, Stylelint

DevOps & Delivery: Git, GitLab CI/CD, GitHub Actions, Docker, Webpack, JFrog Artifactory

AI-Assisted Development: Claude Code, ChatGPT, GitHub Copilot, Prompt Engineering, AI-Assisted Debugging, Refactoring, Code Review, Test Generation

Leadership & Collaboration: Technical Leadership, Developer Mentoring, Code Reviews, Architecture Decisions, Agile/Scrum, Cross-Functional Collaboration

LANGUAGES

English (Fluent) • Hindi (Native)
